## **Ellsworth Adhesives to Showcase Latest Tools and Formulas During Adhesives & Bonding Expo 2025**

GERMANTOWN, WI — Ellsworth Adhesives, a globally leading distributor of adhesives, specialty chemicals, and dispensing equipment, plans to attend the Adhesives & Bonding Expo 2025 in Novi, Michigan to showcase the latest in material tech and dispensing equipment.

Ellsworth's expert Engineering Sales Representatives will be at Booth #822 in the Suburban Collection Showplace from June 24-26 answering questions and demonstrating how efficient hot melt tools, precision robotics, and advanced formulas can tackle multifaceted bulk production challenges.

"Our spray lamination solutions are helping a lot of customers who work with materials like fiberglass or wool," said Engineering Sales Representative Dugan Kemple. "The non-contact system is a great alternative to roll coaters, which can get gunked up with debris. The wide coverage also helps prevent bald spots for softer, thicker substrates."

Visit The Adhesive Experts to learn about:

- Multi-axis robotics for repeatability and throughput
- Diverse options for bonding, sealing, dampening, and more
- Hot melt tools allowing faster, more consistent sprays and beads
- Custom shaped and stacked tapes, films, and pads

Engineers, purchasers, designers, and anyone who uses adhesives are encouraged to register for the show and discover how an upgraded adhesive workflow enables efficiency gains across the entire production line.

This year, Ellsworth Adhesives is partnering with several leading manufacturers to showcase everything from niche adhesives to custom tapes and complete high-volume production solutions. Whether you're working with lightweight foams or replacing welds, visit The Adhesive Experts to discover a solution.

### **About Ellsworth Adhesives**

Ellsworth Adhesives is a global distribution leader offering solutions across adhesives, specialty chemicals, dispensing equipment, converting, kitting, and more. Backed by over 50 years of experience and 1,250 employees across 20 countries, our team of experts helps specify, source, and implement products from top-tier manufacturers to drive assembly excellence worldwide. As a family-owned company, we're guided to act with integrity and achieve quality in every partnership. Learn more at [ellsworth.com](http://ellsworth.com)
