

Ellsworth Adhesives proudly offers a comprehensive line of static mixers from TAH.
 TAH Industries is a leading manufacturer of motionless, static mixer solutions.

Part Number	Size	Features
EA121-224	Mixing Element .248 DIA	Plastic Spiral Bell Mixer. 0.248 in diam.
EA125-24H	Mixer .125 X 24 Element	Series 190 Spiral Bayonet Mixer with H tapered housing is used on 9 mL and 50 mL two component cartridges for mixing epoxies, urethanes, acrylics and silicones.
EA187-24	Mixer Element .187 X 24	Series 160 Plastic Spiral Bell Mixer contains manifolds and valves that separately ports two component materials directly into the mixer.
EA187-24LL	Mixer .187 X 24 Elements	Series 160 Plastic Spiral Bell Mixer with Luer Lock contains manifolds and valves that separately ports two component materials directly into the mixer.
EA187-32	Mixer Element .187 X 32	Series 160 Plastic Spiral Bell Mixer contains manifolds and valves that separately ports two component materials directly into the mixer.
EA187-32LL	Mixer W/Luer Lock 187 X 32	Series 160 Plastic Spiral Bell Mixer with Luer Lock contains manifolds and valves that separately ports two component materials directly into the mixer.
EA187-48	Mixer Element .187 X 48	Series 160 Plastic Spiral Bell Mixer with Slip Luer contains manifolds and valves that separately ports two component materials directly into the mixer.
EA187-48LL	Mixer Element .187 X 48	Series 160 Plastic Spiral Bell Mixer with Luer Lock contains manifolds and valves that separately ports two component materials directly into the mixer.
EA250-16	Mixer Element .250 X 16	Series 160 Plastic Spiral Bell Mixer with Slip Luer contains manifolds and valves that separately ports two component materials directly into the mixer.
EA250-20	Mixer Bayonet .250 X 20	Series 190 Spiral Mixer with Luer Lock contains manifolds and valves that separately ports two component materials directly into the mixer.
EA250-20LL	Mixer Bayonet W/Luer Lock	Series 190 Spiral Bayonet Mixer with Luer Lock contains manifolds and valves that separately ports two component materials directly into the mixer.
EA250-24	Mixer Element .250 X 24	Series 160 Plastic Spiral Bell Mixer with Slip Luer contains manifolds and valves that separately ports two component materials directly into the mixer.
EA250-24LL	Mixer W/Luer Lock 250 X 24	Series 160 Plastic Spiral Bell Mixer with Luer Lock contains manifolds and valves that separately ports two component materials directly into the mixer.
EA250-32	Mixer Element .250 X 32	Series 160 Plastic Spiral Bell Mixer with Luer Lock contains manifolds and valves that separately ports two component materials directly into the mixer.
EA250-32LL	Mixer W/Luer Lock 250 X 32	Series 160 Plastic Spiral Bell Mixer with Luer Lock contains manifolds and valves that separately ports two component materials directly into the mixer.
EA250-48	Mixer 1/4 ID X 48 Element	Series 160 Plastic Spiral Bell Mixer contains manifolds and valves that separately ports two component materials directly into the mixer.

Part Number	Size	Features
EA250-48LL	Mixer W/Luer Lock 250 X 48	Series 160 Plastic Spiral Bell Mixer with Luer Lock contains manifolds and valves that separately ports two component materials directly into the mixer.
EA370-18	Mixer Element .370 X 18	Series 160 Plastic Spiral Bell Mixer contains manifolds and valves that separately ports two component materials directly into the mixer. Stepped.
EA370-24	Mixer Element .370 X 24	Series 160 Plastic Spiral Bell Mixer contains manifolds and valves that separately port two component materials directly into the mixer.
EA370-24LL	Mixer Element .370 X 24ll	Series 160 Plastic Spiral Bell Mixer with Luer Lock contains manifolds and valves that separately ports two component materials directly into the mixer. Stepped.
EA370-30	Mixer Element .370 X 30	Series 160 Plastic Spiral Bell Mixer contains manifolds and valves that separately ports two component materials directly into the mixer. Stepped.
EA370-30LL	Mixer Element .370 X 30 LL	Series 160 Plastic Spiral Bell Mixer with Luer Lock contains manifolds and valves that separately ports two component materials directly into the mixer. Stepped.
EA370-40	Mixer Element .370 X 40	Series 160 Plastic Spiral Bell Mixer contains manifolds and valves that separately ports two component materials directly into the mixer. Stepped.
EA370-40LL	Mixer Element .370 X 40 LL	Series 160 Plastic Spiral Bell Mixer with Luer Lock contains manifolds and valves that separately ports two component materials directly into the mixer. Stepped.
EA500-18	Mixer Element .500 X 18	Series 160 Plastic Spiral Bell Mixer contains manifolds and valves that separately ports two component materials directly into the mixer. Stepped.
EA500-24	Mixer Element .500 X 24	Series 160 Plastic Spiral Bell Mixer contains manifolds and valves that separately port two component materials directly into the mixer.
EA500-30	Mixer Element .500 X 30	Series 160 Plastic Spiral Bell Mixer contains manifolds and valves that separately ports two component materials directly into the mixer. Stepped.
EA500-36	Mixer Element .500 X 36	Series 160 Plastic Spiral Bell Mixer contains manifolds and valves that separately ports two component materials directly into the mixer. Stepped.
